PROFESSIONAL SUMMARY

Computer Science undergraduate with strong interest in Artificial Intelligence, Vision-Language Models (VLM), Natural Language Processing, and multimodal systems. Proficient in Python and experienced in dataset collection, data annotation, preprocessing, validation, and structured data workflows. Familiar with TensorFlow, PyTorch, and model support pipelines. Seeking to contribute to AI research and development through hands-on internship experience at ITRI.

EDUCATION

Presidency University, Bengaluru, India

B.Tech in Computer Science

2024 - 2028 (Expected)

CGPA: 9.0 / 10.0

Yenepoya PU College, Mangalore, India

PUC (PCMC) | 2022 - 2024

Grade: Distinction

Manshar English Medium School, Gerukatte, India

SSLC | 2022

Grade: Distinction

PROJECTS

Hybrid Sentiment Analysis & Text Annotation System (NLP):

- Collected and processed textual datasets for sentiment analysis.
- Performed manual and rule-based annotation of text data.
- Cleaned and structured raw data for consistency and quality.
- Addressed linguistic challenges such as negation and context.
- Built a hybrid model combining lexicon-based and statistical methods.
- Developed a Streamlit app.

Equilibrimeter for Motorcycles:

- Proposed balance monitoring system using a gyroscope and an accelerometer
- Presented the design of an alert system for unsafe lean angles
- Explored AI-based predictive safety models
- Conducted literature review on AI-enabled motorcycle balance systems, including Yamaha Motoroid2 concepts.

Waste Sorting Automation System (Arduino):

- Implemented Arduino-based waste classification using IR and moisture sensors.
- Developed embedded logic for real-time sorting decisions.
- Improved classification accuracy and reduced manual intervention.

Personal Portfolio Website:

- Designed and deployed a professional portfolio website to showcase projects and technical profile.
- Built a responsive UI with structured sections for improved user experience.
- Integrated contact form using Formspree and implemented resume download feature
- Version-controlled and deployed using Git and GitHub Pages

TECHNICAL SKILLS

Programming: Python, C, Basic Java

AI / ML: Data Annotation, Dataset Cleaning, Data Validation, NLP Basics, Computer Vision Basics, Multimodal AI Basics

Frameworks: TensorFlow, PyTorch, Streamlit

Tools: Git, GitHub, Figma

Other: Research Documentation, Agile Methodology, Problem Solving

CERTIFICATIONS

Basics of Artificial Intelligence - *Cambridge International Qualifications*

Agile Project Management - *HP Foundation*

IEEE Tech Week 2025 (Ideathon) - *IEEE*

Figma Bootcamp - *LetsUpgrade*

ADDITIONAL INFORMATION

- Strong interest in AI research, multimodal learning, and emerging technologies
- Quick learner with attention to detail and cross-functional teamwork skills
- Available from June 1, 2026 to August 10, 2026, with flexibility based on project requirements.
