PROFESSIONAL SUMMARY

Computer Science (DevOps) undergraduate with strong interest in DevOps, cloud technologies, automation, CI/CD, and web development. Hands-on experience with Docker, GitHub Actions, Linux, Jenkins basics, Git/GitHub, and deployment workflows through academic and personal projects. Familiar with frontend web development using HTML, CSS, JavaScript, MySQL, and responsive UI design. Quick learner with strong problem-solving ability and interest in modern infrastructure and automation practices.

EDUCATION

Presidency University, Bengaluru, India

B.Tech in Computer Science (DevOps)

2024 - 2028 (Expected)

CGPA: 9.0 / 10.0

Yenepoya PU College, Mangalore, India

PUC (PCMC) | 2022 - 2024

Grade: Distinction

Manshar English Medium School, Gerukatte, India

SSLC | 2022

Grade: Distinction

PROJECTS

Portfolio Website with DevOps CI/CD Pipeline

GitHub: github.com/Suaid2005/portfolio

Live Demo: suaid2005.github.io/portfolio

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Built structured UI sections to showcase projects, technical skills, and professional profile.
- Integrated contact form using Formspree and implemented resume download functionality.
- Containerized the application using Docker and nginx for deployment-oriented workflow.
- Implemented CI/CD automation using GitHub Actions for automated Docker build process.
- Worked with Linux-based environment using WSL2 Ubuntu and Git/GitHub version control.
- Managed deployment workflow and automated build pipeline triggered on GitHub push events.

Technologies Used: HTML, CSS, JavaScript, Docker, GitHub Actions, Git, Linux, nginx

Hybrid Sentiment Analysis and Text Annotation System

- Collected and processed textual datasets for sentiment analysis.
- Performed manual and rule-based annotation of text data.
- Cleaned and structured raw data for consistency and quality.
- Addressed linguistic challenges such as negation and context.
- Built a hybrid model combining lexicon-based and statistical methods.

Waste Sorting Automation System (Arduino)

- Implemented Arduino-based waste classification using IR and moisture sensors.
- Developed embedded logic for real-time sorting decisions.
- Improved classification accuracy and reduced manual intervention.

TECHNICAL SKILLS

DevOps & Cloud: Docker, GitHub Actions, CI/CD Fundamentals, Linux (Ubuntu/WSL2), Jenkins Basics, Git, GitHub, Containerization, Deployment Workflow, nginx Basics

Web Development: HTML, CSS, JavaScript, Responsive Web Design, MySQL

Programming: Python, C, Basic Java

Tools & Platforms: VS Code, Docker Desktop, Jenkins, GitHub Pages, Figma

Other Skills: Problem Solving, Research Documentation, Agile Methodology

CERTIFICATIONS

- **InfraLab: Terraform + Ansible Session** - GoOps Club, Presidency University Bangalore
- **Figma Bootcamp** - *LetsUpgrade*
- **Basics of Artificial Intelligence** - *Cambridge International Qualifications*
- **Agile Project Management** - *HP Foundation*
- **IEEE Tech Week 2025 (Ideathon)** - *IEEE*

ADDITIONAL INFORMATION

- ● Strong interest in DevOps, cloud technologies, automation, and deployment workflows.
- ● Quick learner with collaborative mindset and problem-solving ability.
- ● Available for internships and remote opportunities from June 1, 2026 to July 1, 2026.
